

Diya Prajapati

AI/ML Engineer | Machine Learning, Generative AI & LLM Applications

Ahmedabad, Gujarat, India | +91 9725618684 | prajapatidiya3316@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building, evaluating, and deploying **machine learning** and **Generative AI** applications end to end. Proficient in **Python, scikit-learn, Pandas, NumPy, and SQL**, with practical experience in **data preprocessing, model training and evaluation, LLM integration (Google Gemini API), prompt engineering, and serving models through REST APIs (Flask)**. Skilled in deploying AI applications to production using **Docker, Git, Render, and Streamlit Cloud**, with a strong foundation in **Data Structures & Algorithms, OOP, and Agile/SDLC** workflows. Seeking an AI/ML Engineer role to build scalable, data-driven intelligent systems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Machine Learning: Supervised Learning, Regression, Classification, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Model Training, Model Evaluation, scikit-learn

Generative AI & NLP: Large Language Models (LLMs), Google Gemini API, Prompt Engineering, Generative AI, Natural Language Processing (NLP)

Data Analytics Libraries: Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Keras

Model Deployment & MLOps: Flask, REST APIs, Streamlit, Docker, Git, GitHub, Render, Postman

Databases: MongoDB, SQL, DBMS, MySQL

Web Technologies: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

Core Concepts: Data Structures & Algorithms (DSA), OOP, SDLC, Agile/Scrum, Debugging, Operating Systems

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Effective Communication

AI/ML PROJECTS

AI Income Predictor – Machine Learning Web Application

[Live](#) | [GitHub](#)

Tech Stack: Python, scikit-learn, Pandas, NumPy, Flask, REST API, HTML5, CSS3, JavaScript, Render

- Developed an end-to-end machine learning pipeline for income prediction covering data preprocessing, model training, and evaluation using scikit-learn.
- Integrated the trained model into a Flask REST API for real-time inference, built a responsive frontend for user input and prediction display, and deployed on Render with 99%+ uptime.

NeuroNova – AI Teaching Agent (Generative AI / LLM Application)

[Live](#) | [GitHub](#)

Tech Stack: Python, Streamlit, Google Gemini API, Large Language Models, Prompt Engineering

- Built an LLM-powered AI teaching agent using the Google Gemini API and prompt engineering to generate concept explanations, real-life examples, and auto-generated quizzes on any topic.
- Deployed on Streamlit Cloud with graceful handling of API quota limits, ensuring reliable, uninterrupted user experience.

FinCtrl – Expense Tracking System (Full-Stack)

[Live](#) | [GitHub](#)

Tech Stack: MongoDB Atlas, Express.js, React.js, Node.js, Tailwind CSS, JWT, OTP Auth

- Engineered secure JWT authentication with OTP-based email verification and RESTful CRUD APIs for expense records, user profiles, and category filters.
- Deployed frontend and backend to production, resolving CORS and environment-variable configuration for stable cross-origin performance.

TaskFlow – Task Management Application (Full-Stack)

[Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Built a full-stack task management platform with JWT-secured authentication, Kanban/calendar views, real-time status updates, and deadline tracking, deployed to production.

Salon Booking Platform (Microservices)

Tech Stack: Java, Microservices, OAuth2, JWT, MySQL, React, Redux, Docker

- Building a microservices-based booking platform with an API Gateway, service discovery, OAuth2/Keycloak security, asynchronous RabbitMQ messaging, real-time WebSocket notifications, and Docker containerization.

EXPERIENCE

ShadowFox – Web Development Intern

June 2026 – July 2026

- Developed responsive, cross-browser interfaces using React.js and JavaScript with mobile-first design and pixel-accurate UI implementation.
- Designed and integrated RESTful APIs for dynamic frontend-backend data communication, the same pattern used to serve ML models in production.

CodeAlpha – Java Programming Intern

May 2026 – June 2026

- Strengthened programming and problem-solving skills by implementing data structures (collections), exception handling, and multithreading through hands-on coding exercises.
- Built console-based programs applying OOP design principles, translating requirements into working, debugged code.

EDUCATION

KS School of Business Management & IT – Gujarat University

2023 – 2026

B.Sc. Information Technology

Ahmedabad, India

TRAINING & CERTIFICATIONS

- **Infosys Springboard AI EMPOW(H)ER – Skillsoft** (Jun 2026): Applied AI literacy and emerging technology modules delivered in collaboration with Infosys and Skillsoft.
- **Full Stack Web Development – C-DAC** (Apr – Sep 2025): 6-month intensive program covering HTML, CSS, JavaScript, React, SQL, DBMS, Python and Java with hands-on lab exercises across the full development stack.
- **TCS iON Career Edge – Young Professional** (Oct 2025): Certification by Tata Consultancy Services in professional communication, workplace etiquette, and corporate interview readiness.
